

Identify the Suspect

A crime has recently been committed in one of the science labs in the high school. Investigators were able to narrow the possible field of suspects to six. Your job is to continue the investigation. Use the prints pictured below and the separate suspect sheet to determine who belongs to each print. For each print you are to identify :

1. The suspect
2. Which finger of the suspect left the print
3. The type of print (ex. whorl, ulnar or radial loop, arch, or tented arch)
